Adams, J. R., Jr	99, 107
Algire, G. H	1, 13
Andervont, H. B	283, 329, 403, 579, 583
Barrett, M. K	65, 389, 587, 595
Biesele, J. J	373
Blum, H. F	21, 75, 559
Bryan, W. R	25, 37
Burk, D	363, 417
Calnan, D	257
Chalkley, H. W	47
Cowdry, E. V	373
Crisp, L. R	147
Dalton, A. J	329, 389, 527, 539
Dunn, T. B	359, 555
Earle, W. R	131, 135, 147, 165, 213, 229, 363, 539
Edwards, J. E	328, 389, 583
Emmart, E. W	537
Eschenbrenner, A. B	385
Greenstein, J. P	55, 63, 271, 275, 283, 389
Hartwell, J. L	107, 123
Hawkins, J. W	339, 347, 445
Henshaw, P. S	305, 309, 339, 351, 477, 485, 503, 513, 523
Heston, W. E	403, 409
Jones, B. F	527
Kahler, H	37, 123
Kessel, A. M	359, 361
Larsen, C. D	285, 587, 595
Lippincott, S. W	285
Marshino, O	429
Maver, M. E	65, 571
Melroy, M. B	249, 257
Meyer, H. L	351, 523
Mider, G. B	409
Mitchell, E. R	527
Morris, H. P	285
Nettleship, A	213, 229, 309
Perrault, A	99
Peters, V. B	527
Robertson, W. van B	321
Shear, M. J	81, 99, 107, 123, 461
Shimkin, M. B	25
Spencer, R. R	249, 257
Thompson, J. W	63, 271, 275
Turner, F. C	81, 265
White, F. R	413
White, J	409, 413, 583
Winzler, R. J	363, 417

	Page
Adrenal glands, changes in, following exposure to lowered oxygen tension	527
Amino acids, effect on induction of leukemia in mice	409
Ascorbic acid, in tumors and homologous normal tissues	321
Azo compounds, effect of two added to diet of mice	583
Bacillus prodigiosus. *See Serratia marcescens.*	
Biotin vitamer content of tumors	363
Breast-cancer therapy applied to control programs	445
Cancer—	
blood proteose and	417
breast, therapy applied to control programs	445
mammary, effect of environment	579
National Cancer Institute Act, administration	429
serodiagnostic tests for	571
State programs	347
Carbon tetrachloride hepatomas, size and spacing of multiple doses in induction	385
Carcinogenic hydrocarbons, morphology and growth of subcutaneous tumors induced with	25
Carcinogenesis, epidermal, chromosomal changes	373
Cathepsins of normal and neoplastic tissues, serologic and anaphylactic reactions	65
Chemotherapy, experimental, of tumors	265
3,5-Cholestadiene, administration to mice and rats	589
Cystine, diet low in	413
Depolymerases for yeast and thymus nucleic acid	55
Desoxycholic acid, test for carcinogenicity of	575
Dicholesteryl ether, administration to mice and rats	587
Diethylstilbestrol, effect on mammary tumor formation	413
Ear, rabbit's—	
injection and clearing method for	359
measurement of epithelial growth in surgical wounds of	351
Enzymes, range of activity in normal and neoplastic tissues	275
Equipment—	
microcinematographic	147
photomicrographic	135
Ethyl carbamate	309
Fibroblast cultures, of mouse	165
Genetic influence in occurrence of mammary tumors	403
Glassware, method of cleaning	131
Golgi material, observations on	539
Hemorrhage-producing bacterial preparations, potency	99
Hepatoma E	537
Hepatomas, induction of carbon tetrachloride	385
Jensen sarcoma	63
Lard, heated, effect of feeding to rats and lesions observed	285
Liver catalase activity	283
Leukemia—	
effect of amino acids in induction of, in mice	409
in physicians	339
Malignancy in vitro	131, 135, 147, 165, 213, 229, 363, 539
Melanoma, studies of, using transparent-chamber technique	13
Mitochondria, observations on	539
National Cancer Institute Act	429
Oxygen tension, lowered, changes in adrenal glands following exposure	527
Proteose, blood	417
Roentgen injury, experimental	477, 485, 503, 513
Sarcoma, transplantable osteogenic	389
Serratia marcescens—	
culture filtrate—	
isolation of hemorrhage-producing fraction	81
nature of hemorrhage-producing fraction	107
ultracentrifugal and electrophoretic analysis of hemorrhage-producing fraction	123
Species adjustment—	
continuous exposure	249
discontinuous exposure	257
Thymus nucleic acids, depolymerases for	55
Thyroid, mouse, ciliated cells of	555
Tissue—	
changes brought about by radiation	503
multiple carrier for histologic techniques	361
Tissues—	
effect of roentgen injury on	477
hepatic, of rat, enzymatic activity	271

Tissues—Continued. Page
neoplastic—
depolymerases for yeast and thymus nucleic acid in 55
serologic and anaphylactic reactions of cathepsins of 65
normal—
depolymerases for yeast and thymus nucleic acid in 55
serologic and anaphylactic reactions of cathepsins of 65
quantitative morphologic analysis of 47
Tumor—
adrenal cortical, transplantable spontaneous, in C mouse 329
growth, effect of irradiation-killed cells on 305
mammary, ultracentrifugal studies of complexes obtained 37
Tumors—
ascorbic acid content 321
biotin vitamer content 363
chemical treatment of 81, 99, 107, 123, 461
estimation of growth rates of 21
Tumors—Continued. Page
experimental chemotherapy of 265
induction with ultraviolet radiation 75, 559
mammary, genetic influence on occurrence 403
metabolism 363
pathology of, produced in vitro 229
pulmonary—
induction with ethyl carbamate 309
production with urethane 309, 523
subcutaneous—
morphology and growth of, induced with carcinogenic hydrocarbons 25
reactions of mice to injection of hemorrhage-producing bacterial polysaccharide 461
Transparent-chamber technique 1, 13
Ultracentrifugal studies of complexes from mouse milk, mammary tumor, etc 37
Ultraviolet radiation, tumor induction with 75, 559
Urethane 309, 523

○
